## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2, 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2, line 2 “the protuberance has spherical side surface” is unclear how the protuberance(20) for engaging with a rectangular aperture (13) has a spherical side surface (see fig 4).

Claim 5 has similar problems.

Claims 2, 5 are not considered over the prior art

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 4, 10-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Davidson et al.

Davidson et al disclose a printed circuit board (5) having a ground plane (inherent) and at least one contact protuberance (6) which defines first and second portions, an EMI shield member (1) having a contact wall (3) which defines rectangular apertures (7)(re claims 1, 3, 10, 12, 15, 18)

Re claim 4, see Fig 2

Re claims 11,13,16,17(see Fig 3).

Re claim 14, the structure is functional as claimed.

Claims 1, 3, 4, 6-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Bianca et al.

Bianca et al disclose a printed circuit board (26) having at least one protuberance (10), a shield member (20, 38), an aperture (24) being rectangular (Fig 4) and a ground plane (inherent) (re claims 1, 3, 4, 6, 10-15, 17, 18).

Re claims 7-9, see Fig 4.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-18 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
